

Getting Started with Selenium Builder

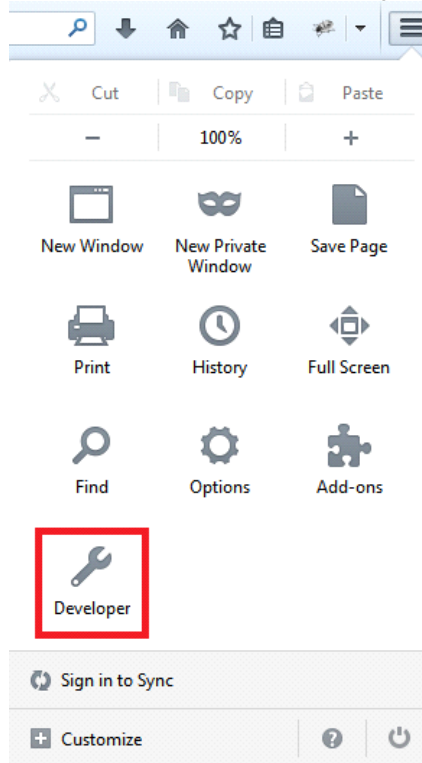

Tuesday, November 25, 2014 8:59 AM

Installing SeleniumBuilder

- Go to <https://saucelabs.com/builder>
- Click on **Download**
- Authorize installation of the plugin

Recording the test

- In Firefox: Select **Menu > Developer > Launch Selenium Builder**

- In **Start recording at**, enter the URL under test, for example, <http://www.google.com>
- Click the **Selenium 2** button
- Perform the test steps in Firefox
- Selenium Builder will show a recording of your test
- Click **Stop recording** to stop the recording
- To export to other languages, select **File > Export...**
