Capturing Test Step Status with Assertions

Tuesday, November 14, 2017 3:50 PM

The following Groovy Script at Tear Down area of Test case will log the status of the steps along with its associated Asserti on Status in the location provided within the script:

Ref. RPD: RPD:35413686

```
def step_a = "";
for (testStepResult in testRunner.getResults() ) {
  def testStep = testStepResult.getTestStep()
step_a = step_a + "TestStep [ " + testStep.name + " ] finished with status " + testStepResult.getStatus().toString() + "\n"
  //log.info testStep.testRequest.response.responseHeaders
if (testStep instanceof com.eviware.soapui.model.testsuite.Assertable)
       for( assertion in testStep.assertionList )
            def messages = ""
            def isAssertionLogged = false
            for( message in testStepResult.getMessages() )
                if (message.contains(assertion.name))
                       {\tt messages = messages + testStep.name + "- Error [" + message + "]" + " \n";;}
                       isAssertionLogged = true
                      break
               }
          }
          if(isAssertionLogged) //if there is no error message for the assertion, the assertion is either passed (VALID) or was not ran (UNKNOWN)
                 step\_a = step\_a + "Assertion [" + assertion.label + "] has status [FAILED]" + "\n"; step\_a = step\_a + messages; \\
                 if(assertion.isDisabled()) {
    step_a = step_a + "Assertion [" + assertion.label + "] has status [UNKNOWN]" + "\n"
                 else {
                      step a = step a + "Assertion [" + assertion.label + "] has status [OK]" + "\n"
         }
}//end for
log.info "Let's get Test run results"
File file = new File("C:/Tellus/Results/TestRunnerStatus20.txt")
file.write step_a
```
