Core-UI Helpers

Tuesday, May 02, 2017   6:54 PM

Let's update our agenda for the Core UI helpers weekly catchup meeting here:
- *Issues to be discussed/debugged related to Thief, Thief Grid or Charts*
- *Change in priority of requests lined up if any*

- Ensure that the RPDs or GIT issues are filed by Tuesday so that we can go over it in the meeting on Wednesdays if needed
- Issues reported should have a reproducer for the issue ready for testing and debugging that is outside of the application-code. **QA members meet with application-engineers prior to these meetings to create reproducers for issues separately from the application code**
- Topics to be discussed should be shared by Tuesday EOD with Evan Wolbach, Thomas Crescenzi, Josh Fee, Amy Richards

Thief angular helpers issues: https://gitlab.factset.com/web-infrastructure/thief-angular-testing/issues
Thief grid helper issues: https://gitlab.factset.com/thief/angular-grid/issues
Charts: RPD Product -> FDSChartJS

Provide the following information while filing issues for Core UI team (includes thief-angular, thief-grid, fdschartjs etc):
- Please attach a minimal JSBin Reproducer.
- What application is this from? Do you know any other applications that may be affected?
- If applicable, in what version did this issue begin?
- How does this impact the workflow in your application?
- What is the severity/timeline for this request? Make your case.
- Is there an acceptable workaround?
- Are there any related RPDs? If so, please include a link.
