Protractor and Selenium Scripting Efficiency

Tuesday, July 18, 2017   1:36 PM

- Workstation vs Only Web makes it difficult
- Automation tools integration
- Custom errors
- Aptana IDE makes it slow for us - Shiva
  - Compare with RubyMine
- Customization needed
- Test cases which run on WS and Web. WS test case takes time to automate
  - Can we automate Web first and then WS
- Application knowledge and building common utils day 1 rather then waiting for substantial test suite.
- Testing on separate VMs due to windows and Office suite
- Boiler plate code
- Sales force account creation and prerequisites

Error codes and handle ling
Selenium Ruby is a good candidate - Surendra
Nightwatch Js - Surendra

What is a good way to review scripts to make they cover everything in
manual test case?
